

Do you have a project related question?

Browse through our [FAQ page](#) to find answers to our most commonly asked questions in this project:

- Why doesn't Cassandra return all rows for a query if we don't have a unique primary key?
- Do the checkpoint files in `event_data/.ipynb_checkpoints/2018-11-01-events-checkpoint.csv` need to be there?
- Why is the order of columns in `column_definition` of `CREATE TABLE` important? (Cassandra)
- Which is better and why? : A partition key with 2 clustering columns or A composite partition key with one clustering column?

If you have any additional questions regarding this project, check out [Knowledge](#) and our technical mentors will provide additional guidance!
